Professional Summary

Senior iOS engineer with 10+ years at Samsung R&D Institute Bangladesh, currently Staff Engineer I. Contributed to SmartThings from initial release through feature development and maintenance using Swift, SwiftUI and UIKit. Led a four-engineer camera-feature team, built 100+ native APIs and improved architecture and testability through MVVM/MVVM-C and unit testing. Recent work spans native connectivity SDKs and AI-assisted development with Codex, Claude and Gemini.

Technical Skills

Languages: Swift, Objective-C, **C/C++**, JavaScript, **Python**
iOS Frameworks: SwiftUI, **UIKit**, **Combine**, Core Data, RxSwift
Architecture & APIs: MVVM, MVVM-C, dependency injection, Command pattern, native API design
Networking & Media: IoTivity, **BLE**, WebKit, **REST APIs**, WebRTC, RTSP, WebSockets
Performance & Systems: Multithreading, **Memory Management**, Performance Optimization
Testing & Delivery: XCTest, unit testing, **TDD**, UI testing, Fastlane, CI/CD pipelines
Tools: Xcode, Instruments, **Git**, Perforce, Jira; **Codex**, **Claude** and Gemini

Professional Experience

Samsung Electronics [Samsung R&D Institute Bangladesh Ltd. (SRBD), Dhaka, Bangladesh.]

Staff Engineer I | March 2026 - Present

- *Contribute to SCClient / IoTivity connectivity SDK development and library releases for SmartThings iOS.*
- *Implement native connectivity APIs (C/C++ → Swift/Objective-C) for seamless integration with iOS applications.*
- *Work on version-aware resource subscriptions, caching, asynchronous callbacks and offline diagnostics.*
- *Contribute to subscription cleanup, BLE onboarding and UDP recovery after Wi-Fi changes; investigate connectivity issues.*
- *Support Xcode compatibility, dependency integration, framework delivery and release documentation with global teams.*

Technical Lead Engineer | March 2023 ~ February 2026

- *Led a four-engineer Home Care Monitor team, translating requirements into iOS implementation and delivery tasks.*
- *Developed WebRTC/RTSP live streaming, playback and camera controls for connected devices.*
- *Implemented Core Data caching and pagination to improve data fetching and handling.*
- *Refactored modules with SwiftUI, Combine and MVVM-C, separating presentation and navigation responsibilities.*
- *Collaborated with global engineering teams on requirements, integration, debugging and feature delivery.*

Lead Engineer | March 2020 ~ February 2023

- *Designed and developed scalable iOS modules and APIs for SmartThings platform.*
- *Built 100+ native APIs bridging JavaScript-based plugins and iOS native code.*
- *Resolved user-reported issues across web/native plugin boundaries in released SmartThings app versions.*
- *Mentored engineers and conducted code reviews to ensure high-quality code standards.*

Sr. Software Engineer | March 2018 ~ February 2020

- *Migrated Settings, Samsung Members, Dashboard Card and Plugin Platform to MVVM for modularity and testability.*
- *Reduced cyclomatic complexity from 250+ to 15 using the Command pattern.*
- *Developed Notifications and History modules with unit tests, APNS, dependency injection and SQLite.*

Software Engineer | May 2016 ~ February 2018

- *Contributed to initial development and release of SmartThings iOS application.*
- *Built IoT integrations using IoTivity, Swift, and Objective-C.*
- *Developed Settings, Samsung Members, device onboarding and Invitation with Swift/MVC and REST integrations.*

AI-Assisted Development & On-Device Prototypes

- Use Codex, Claude and Gemini for UI development, implementation, debugging and testing.
- Authored and adapted lightweight Hugging Face models for integration into Xcode projects.
- Built iOS proofs of concept for local model integration and on-device AI experimentation.
- Explored model optimization and on-device inference through PyTorch workflows.

Projects & SDKs

✦ **SmartThings(iOS) |** Development Project for iOS at SRBD (May 2016 ~ Present) (Swift, SwiftUI)

- *Contributed to initial app development and release, then device connectivity, plugins and camera features.*
- *Implemented device onboarding, invitations, notifications and connected-camera features.*

✦ **SCClient / IoTivity SDK | (Swift, Objective-C, C/C++)**

- *Implemented native wrappers, subscriptions, callbacks and onboarding in the iOS connectivity layer.*

✦ **Home Care Monitor(Camera) Plugin** | (Swift)

- *Led four engineers on live streaming, playback, camera controls and monitoring features.*

✦ **LUX(Speaker) Web Plugin |** (JS, CSS, HTML)

- *Developed plugin for Samsung Galaxy Home mini (Speaker) device.*

Education

Khulna University of Engineering & Technology (KUET), Khulna, Bangladesh
BSc in Computer Science and Engineering | February 2012 - April 2016

Awards & Recognition

✓ Team of the Year, SRBD (2023).
✓ Recognition of Excellence - Development, SRBD (Q4 2022).
✓ Professional Level Certificate in Software Contest, Samsung (2022).
✓ STAR of the Month (December 2021); ICON of the Month (August 2020), SRBD.
✓ Best Collaboration Award, Samsung Software R&D Center (2017).
