Md Atikul Gazi

Staff Engineer in iOS and SDK Development

Dhaka, Bangladesh | +880 1914 088381 | atiksplanet@gmail.com

linkedin.com/in/atiksplanet | github.com/atiksplanet

Professional Summary

iOS and SDK engineer with 10+ years at Samsung R&D Institute Bangladesh, developing SmartThings features for connected devices. Experience includes C/C++ integration with Swift, live camera streaming, native API development and application architecture. Progressed from Software Engineer to Staff Engineer, with hands-on development and leadership of a four-engineer camera-plugin team. Collaborated with engineering teams in South Korea, the US, China and India.

Technical Skills

Languages: Swift, Objective-C, C, C++, JavaScript

iOS: UIKit, SwiftUI, Combine, Core Data, WebKit, Core Bluetooth

SDK and connectivity: IoTivity, native API integration, BLE, REST APIs, WebSockets, WebRTC, RTSP

Architecture and testing: MVC, MVVM, MVVM-C, dependency injection, Command pattern, XCTest, TDD

Tools: Xcode, Instruments, Git, Perforce, Jira, Fastlane, Carthage

Professional Experience

Samsung R&D Institute Bangladesh Ltd. (SRBD)

Samsung Electronics | Dhaka, Bangladesh | May 2016 - Present

Staff Engineer I | March 2026 - Present

- Maintain and release the IoTivity Core SDK used by the SmartThings iOS application.
- Analyse the IoTivity codebase, implement C/C++ APIs and expose them to native iOS code in Swift.
- Translate stakeholder requirements into implementation tasks for SDK updates and iOS integration.

Technical Lead Engineer | March 2023 - February 2026

- Led a four-engineer team developing the Home Care Monitor camera plugin for SmartThings iOS, including live video streaming with WebRTC and RTSP.
- Refactored iOS modules with SwiftUI and Combine using the MVVM-C pattern.
- Improved data fetching through Core Data caching and pagination, and developed Bluetooth interfaces for BLE devices.

Professional Experience Continued

Samsung R&D Institute Bangladesh Ltd. (SRBD) | Dhaka, Bangladesh

Lead Engineer | March 2020 - February 2023

- Managed the Web Plugin and Plugin Platform modules linking web applications with SmartThings iOS.
- Built 100+ native APIs connecting JavaScript-based plugins with iOS functionality.
- Developed the LUX web plugin for the Samsung Galaxy Home Mini using JavaScript, HTML and CSS.
- Investigated and resolved user-reported issues in SmartThings plugin modules.

Senior Software Engineer | March 2018 - February 2020

- Migrated Settings, Samsung Members, Dashboard Card and Plugin Platform modules to MVVM.
- Reduced cyclomatic complexity from 250+ to 15 through refactoring with the Command pattern.
- Developed Notifications and History modules with unit tests, using APNS, dependency injection and SQLite.

Software Engineer | May 2016 - February 2018

- Built an early SmartThings iOS proof of concept with IoTivity, Swift and Objective-C, and contributed to the initial App Store release.
- Developed foundational iOS modules using MVC and integrated third-party SDKs and REST APIs.

Education

Khulna University of Engineering & Technology (KUET), Bangladesh
Bachelor of Science in Computer Science and Engineering | April 2016

Awards and Recognition

- Recognition of Outstanding Contribution (Team of the Year), SRBD | 2023
- Recognition of Excellence (Development), SRBD | Q4 2022
- STAR of the Month | December 2021; ICON of the Month | August 2020
- Best Collaboration Award, Software R&D Centre, Samsung Electronics | 2017

Availability

Open to opportunities in Bangladesh, international relocation and remote work.
